I forward this list of the orchids to be collected and imported the coming year to be followed by the catalogue of more detail and notes that should be of great interest, as they were taken to answer the many inquiries of the Growers and Gardeners who I have had the pleasure to meet, throughout the orchid world. These notes should dissolve many problems that have proven vexatious in the past. I respectfully solicit any inquiries of any nature pertaining to orchid growing. Not only should the collector furnish true type but every detail of their natural growth should be at all times within easy reach of the grower.

All collected by myself or under my personal supervision. Shipped direct in original cases. Guaranteed in good order, f. o b. New York.

Cattleyas.

The most beautiful American Orchid, ideal for cut flowers and exhibition purposes, taking more than one-half of the space of all large collections. Commercially it has no equal; the flowers will stand one month if desired before cutting.

Cattleya Bogotensis.
